By:Angela Bastida,Darío Rodrigo,Paco Pérez and Alba Andreo

# INDEX

- THE PYRAMIDS
- EGYPTIAN TEMPLES
- TOMBS
- MUMMIES AND MUMMIFICATION PROCESS
- THEORIES ABOUT CONSTRUCTIONS OF THE PYRAMIDS

# PYRAMIDS

- Was a royal tombs.
- Quadrilateral base, rises to a triangular point.
- The pyramids were built in the fourth century.
- They still retain much of their majesty.

# Egyptian temples

- Home of the good and goodesses
- Parts:
- Layoot
- Roof
- Section
- Landscape
- Decorations
- Warship
- Facade

# TOMBS

- Repository of the remains of the dead.
- They been located in caves
- Contains the remains of humans and their possessions
- Homes of the dead
- Funerary monuments

# MUMMIES

- ✧ The mummies are the bodies of animals or humans involved in bandages, this is because they want to honor them.
- ✧ There are more civilizations than the Egyptian who practice the mummification.
- ✧ When they mummify the bodies they put it in a tomb.

# Mummification Process

- The process of embalming and treating the death bodies was called mummification in the Ancient Egypt.
- They did it because they thought after the death it will be a new life.
- Because of this they prepare the body for the new life.

# Theories about the construction of the pyramids

- Later pyramids were not constructed in the same way as earlier pyramids
- Most of the hypotheses are based that stones were quarries with copper chisels.
- They believed that pyramids been built by slave labor.
